IT9910 Grabber Device (HD) drivers for Windows 7 64-bit An IT9910 Grabber Device (HD) driver is needed to use this device on a computer running Windows 7 64-bit. This can be downloaded from the manufacturer's website. The IT9910 is used to read the data inside HDDs and SSDs by connecting it through USB 3.1 type C connector cables. The driver can work with any brand of HDD or SSD and connect easily through any available USB3 port on your computer. Please note that despite the manufacturer's website being in Japanese, the driver download section is in English and appears to have been translated via Google Translate. The driver installer file can be downloaded from the following link:

Release notes: The latest version available is 1.0.0.8015 dated 27 October 2017 specifically designed to support Windows 7 64-bit operating system. Device installation software for IT9910 Grabber Device (HD) is included inside this package.
